

Our firm has been providing domestic and international environment and treatment technology Project, implementation and management services since 1990 until date. It is among our main objectives to produce "TURNKEY" solutions.

We are holding the paper pride for being the one of Turkey's first and important firms operating in this field of activity. We are conscious and aware that our field of operation requires top level speciality. In addition to our specialist personnel, remaining in close contact and coordination with the universities is a SINE-QUA-NON principle that we can never leave out.
